

ABSTRACT

EVALUATION OF MEDICINE STORAGE IN MEDICATION SERVICES IN THE EMERGENCY INSTALLATION OF DR. DR. SOEDOMO

Ulini Hayatul Wawa

Drug storage is an activity of storing and maintaining by placing the drugs received in a place that is considered safe from theft and can maintain the quality of the drugs. An appropriate and good storage system will be one of the determining factors for the quality of distributed medicines. In order to achieve the effectiveness of drug therapy and health goals, drug stability is needed which supports drug storage conditions. This research was conducted to determine the drug storage system in the Emergency Medicine Service at RSUD Dr. Soedomo Trenggalek.

This research was conducted to evaluate drug storage in the Emergency Medicine Service at RSUD Dr. Soedomo Trenggalek. This research is a qualitative descriptive study with an observational approach through direct observation of the running system accompanied by interviews with staff involved regarding drug storage compared to PERMENKES No. 72 of 2016.

The results of this study showed that the drug storage room was in accordance with the standards of PERMENKES No. 72 of 2016 with a percentage of 83.3%. For the preparation of drug stocks, there are still indicators that have not been met and a percentage of 62.5% was obtained. Based on the evaluation of drug storage The emergency room drug service at Dr. Soedomo Trenggalek Hospital still needs to improve the suitability of drug storage and improve facilities and infrastructure
