

ABSTRACT

PROFILE OF LANSOPRAZOLE AND ANTACID PRESCRIBING IN GASTRITIS PATIENTS AT AROFA PAMEKASAN PHARMACY FOR THE PERIOD OF JANUARY-FEBRUARY 2024

(Studies conducted at the Arofa Pamekasan Pharmacy)

Utami

The aim of this research was to determine the profile of lansoprazole and antacid prescriptions in gastritis patients at the Arofa Pamekasan Pharmacy for the period January - February 2024. The type of research carried out in this research was quantitative observational research using descriptive data presentation methods. The research sample used was prescriptions containing lansoprazole and antacids for gastritis patients at the Arofa Pharmacy for the period January - February 2024 with a population of 746 prescriptions.

The results of the research used a simple random sampling technique with a purposive sampling method (n=261 recipes). In conclusion, women experience more gastritis than men. Lansoprazole prescriptions for gastritis patients at the Arofa Pamekasan Pharmacy for the period January - February 2024 were higher than antacid prescriptions for gastritis patients at the Arofa Pamekasan Pharmacy for the January - February 2024 period.
