

ABSTRACT

DISTRIBUTION AND ABOLITION OF PHARMACEUTICAL SUPPLIES AND VITAMINS FOR DISASTER MANAGEMENT IN BPBD PROVINSI JAWA TIMUR

Wahyu Priyanka Danandra

BPBD Provinsi Jawa Timur is one of the regional disaster management agencies in Indonesia. Its main task is to carry out disaster management in East Java Province. Pharmaceutical supplies contained in BPBD Provinsi Jawa Timur include medical devices and household health supplies. Logistics warehousing management, such as proper distribution and abolition in pre-disaster times as part of preparedness, can help determine the type and amount of logistics inventory in the warehouse correctly and quickly for the disaster response and post-disaster periods. The purpose of the study was to determine the management of pharmaceutical and vitamin supplies for disaster management at BPBD Provinsi Jawa Timur, including distribution and abolition. Based on the results of research on the distribution and abolition of BPBD Provinsi Jawa Timur pharmaceutical and vitamin supplies, it can be concluded that the distribution process for BPBD Provinsi Jawa Timur pharmaceutical and vitamin supplies has been carried out well, but there are still obstacles where there are limited personnel to issue relief items when delivery will be made and they do not have a special vehicle for medical devices. which require special treatment, such as rapid testing and PCR, and the occurrence of trouble on the vehicle. To minimize delays in delivery, BPBD Provinsi Jawa Timur should form a team that only specifically handles the transportation of aid goods. It is necessary to carry out periodic checks on vehicles and special vehicles.

Keywords : Pharmaceutical supplies, vitamin, distribution, abolition, management disaster.
