

ABSTRACT

PLANNING, PROCUREMENT AND WAREHOUSING OF PHARMACEUTICAL AND VITAMIN SUPPLIES FOR DISASTER MANAGEMENT AT THE REGIONAL DISASTER MANAGEMENT AGENCY (BPBD) OF EAST JAVA PROVINCE

Rizqa Nur Rahma

Logistics management and disaster management equipment is the management of logistics and equipment including planning, procurement, warehousing, distribution, and elimination in order to achieve goals and objectives effectively and efficiently. This research was conducted to determine the management of pharmaceutical supplies and vitamins at the Regional Disaster Management Agency of East Java Province which includes planning, procurement and warehousing. This research uses a qualitative descriptive research design conducted at the Regional Disaster Management Agency of East Java Province. Respondents in this study were employees who met the inclusion criteria, namely 1 Head of Emergency and Logistics, 1 Head of Emergency Section and 2 Emergency and Logistics staff. The data collection techniques carried out are through observation, document review and interviews. Based on the results of the study, that logistics management at the Regional Disaster Management Agency has not been carried out properly. This can be seen from the warehousing process that has not reached regulations in accordance with applicable regulations. The conclusion of this study is that at the planning and procurement stage it has been done well, at the warehousing stage in the subsection it is still not carried out even though most of it has been carried out. The advice given is in the form of guidelines for monitoring the physical damage of goods needed before distribution and the need for security monitoring tools and needs to be emphasized for the warehouse maintenance stage to achieve regulations in accordance with applicable regulations.
